Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

A: claims 1-12 and 21-32 drawn to a LCD of Fig. 4 and a method of fabricating such LCD.

B: claims 13-20 and 33-40 drawn to a LCD of Fig. 6 and a method of fabricating such LCD.

Further, Species A and B each contains claims directed to the following patentably distinct sub-species:

Sub-species A

A1: claims 2 and 22 drawn to the LCD of Fig. 4 comprising a cholesteric liquid crystal layer.

A2: claims 3 and 23 drawn to the LCD of Fig. 4 comprising a ferroelectric liquid crystal layer.

Sub-species B

B1: claim 39 drawn to the LCD of Fig. 6 comprising a cholesteric liquid crystal layer.

B2: claim 40 drawn to the LCD of Fig. 6 comprising a ferroelectric liquid crystal layer.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed *sub-species* for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 4-11, 21 and 24-32 are generic with respect to A1 and A2 while claims 13-20 and 33-38 are generic with respect to B1 and B2.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2871

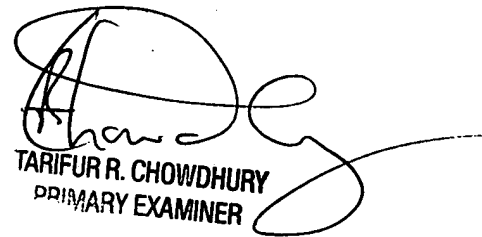

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Tai Duong at telephone number (571) 272-2291.
